

INSTRUCTIONS FOR USE AND MAINTENANCE VERTICAL BLINDS

General information

This manual is intended for all users of vertical blinds manufactured by the company of Servis Climax. Read the manual thoroughly before using the product, and keep it for the duration of the product use. A four-year guarantee applies to all products of the SERVIS CLIMAX company.

Manufacturer: SERVIS CLIMAX a.s., Jasenice 1253, 755 01 Vsetín, Company ID no.: 25352628

Thank you for buying the products of SERVIS CLIMAX.

This symbol indicates a possible danger or important information.

Important information

1) Use the vertical blind only when there are no objects or people in the path of the roller blinds when it is being pulling up or down.

2) Do not operate the vertical blind pulling the bottom rail. The brake can be damaged.

3) Do not hang any objects on the product.

4) In case small children are around, pay a good attention, even strangulation can occur although the vertical blind is produced according to Standard 13120+A1 and it is fitted with the safety devices.

5) Remove beds, cots and furniture which are near the window containing chains

6) To avoid entanglement or strangulation, place the chains out of the reach of children.

7) Cords and chains can wrap around a child's neck.

8) The repair or service is necessary, it is always necessary to contact the company that carried out the installation or the manufacturer. In this case, the vertical blind cannot be used any longer.

Caution concerning fabrics:

1100, 1101, 1102, 1103, 1104, 1105, 1106, 1107, 1108, 1109, 1110, 1111, 1112, 1113, 1114, 1115, 1205, 1210, 1212, 1213, 1214

When in contact with water or another liquid, they may show clearly outlined spots and maps, warp or otherwise deform in shape due to humidity (wrinkling, irregular crinkling). Use dry treatment only, as recommended below (Maintenance).

Control – general information

9) The control chain and cord serve to operate vertical blinds.

10) By pulling one strand of the chain, the blind moves to the right or to the left.

11) By pulling the chain, the inclination of the individual slats is adjusted.

12) Sloped vertical blinds are fitted with a brake which enables to stop the blind in any position without arresting the cord.

13) During use, handle the product carefully.

Maintenance

- 14) The product does not require any extraordinary maintenance and lubrication of the control mechanisms.
- 15) A soiled fabric, e.g. with dust, is cleaned using a soft brush, the same as you use to clean clothes.
- 16) It is always good to Hoover the fabric using a vacuum cleaner set to the lowest power in advance.

Only for selected fabrics – according to the sample collection (pictogram , the sample collection can be seen at www.servisclimax.eu):

- 17) To perform wet cleaning, put the fabric on a smooth, clean surface.
- 18) Use only mild soap solutions without chemical additives at a temperature up to 30 °C. The cloth should be moist, not wet.
- 19) Clean the fabric by pulling the cloth from edge to edge on both sides.

20) Do not use aggressive cleaning agents such as organic thinners, solvents, cleaning sand, cleaning pastes, steam generators, strong alkaline cleaning agents, etc.

21) Make sure to clean the slats or fabrics carefully to prevent dents or other damage.

22) Fabrics with a steamed aluminium layer must not be cleaned using water – the layer would be damaged.

23) When cleaning windows, set the product in such a position that it could not be damaged and it would not impede the cleaning at the same time.

24) Protect the product from the soiling during the building operations or painting.

25) Do not iron the fabrics due to the surface impregnation.

Addendum for Silueta Fabrics

Observe the following additional instructions when using fabrics from the Silueta collection:

- The fabrics are intended exclusively for indoor use in dry rooms.
- To avoid damaging the surface structure of the fabric, do not rub it hard when cleaning small stains.
- In addition to standard prohibitions, it is expressly prohibited to steam-clean, machine-wash and machine-dry these fabrics.
- Pay increased attention to protecting the slats against warping and sharp bends when handling.
- Regularly check whether the slat suspensions are free of damage and the slats are hanging in the horizontal position.
- Ensure that the movement of the fabric is not blocked by any objects.
